ABDULSALAM ODETAYO

PROFILE

A recent graduate from CCBC and a current student at UMBC, I am a dedicated Jr. Web Developer and Jr. Software Developer with experience in design and knowledge in web and software development. Confident in ability to incorporate programming and graphics designing skills into software design and development using technical skills. Looking to start my career as a software developer where I can contribute my skills while developing them.

EDUCATION

The University of Baltimore, Baltimore County
JAN 2021 - DEC 2022
Bachelor of Science in Computer Science

The Community College of Baltimore County
JAN 2018 - MAY 2020
Associate of Science in Computer Science
- Cumulative GPA: 3.79/4.0
- Relevant Coursework: Object-Oriented Programming, Calculus I & II, Linear Algebra & Discrete Mathematics

GoldenLine Schools
AUG 2014 - MAY 2016
General Educational Development Diploma
- Total Score: 696/800
- Coursework: Science, Mathematical Reasoning, Reasoning Through Language Arts & Social Studies.

SKILLS

Programming Languages

JavaScript, HTML, CSS, Java, C++, SQL,

Industry Knowledge

Web Development, Front-end Development, Responsive Web Design, Web Applications, REST APIs, Object-Oriented Programming (OOP) & Graphic Design.

Tools & Technologies

Visual Studio Code, Figma, Git, GitHub, jQuery, HTML5, CSS3, Bootstrap4, React.js, Node.js, CorelDraw, Eclipse, Postman, MongoDB Atlas, IntelliJ IDEA & Android Studio.

PROJECTS

Quick Search Dictionary

AUG 2020 - PRESENT
Personal Project

A personal project developed by me, QuickSearch Dictionary is a simple online English dictionary targeted towards individuals that prefer specific information about words over full documentation. Quick Search is a web application that runs on every device with a web browser. QuickSearch is also a responsive application, therefore it displays according to the viewport of the device launching the web application. This web application is connected to a database with updated words in the English dictionary. The web application also features a mini quiz game to test users' vocabulary.

Skills, Concepts, Tools & Technologies

JavaScript, HTML, CSS, React.js, REST APIs, Git, Github, Responsive web design, Visual Studio Code, Data Structures, Object-Oriented Programming.

CCBC Advanced Programming Final Project

AUG 2019 - DEC 2019
Course Project

Led a team of 3 students to create a Bot/MockAI named GILDA. GIDLA is a bot meant to give the user the impression of artificial intelligence. Due to the time frame, GILDA's features were limited to responding to a small number of requests. From running tic tac toe on command to telling different jokes and solving basic mathematical problems. GILDA also had a dictionary feature that contains information of all the words in the English Dictionary, as of 2018. During development, I played the role of the programmer and partly the designer.

Skills, Concepts, Tools & Technologies

Java, Eclipse, Visual Studio Code, Data Structures, Sorting Algorithms, Recursion, Object-Oriented Programming & GUI.

HOBBIES

Gaming | Cardio | Coding | Cooking
